1. Indexed the complete GSMArena catalogue — **13,831 devices** across 126 brands.
2. Narrowed to phones announced 2019 or later, excluding tablets, whose maximum advertised RAM is at least 8 GB — **2,299 candidates**.
3. Fetched every candidate's spec page and parsed three fields verbatim: *Network* → *Technology* / *5G bands*, *Memory* → *Internal*, and *Sound* → *3.5mm jack*. All 2,299 pages were retrieved successfully, with no fetch errors.
4. Kept the **461** devices where 5G is present *and* an 8GB RAM configuration is listed *and* the jack is Yes.
5. Annotated Indian rupee prices for the 8 GB variant where a listing could be found, reading schema.org offer data from Bajaj Finserv price pages. Each offer was verified to name the same brand, model tokens and Pro/Plus qualifier, because several price pages carry offers for neighbouring models.

Notes

- A phone qualifies only if an actual 8 GB configuration exists.** A model sold in 6 GB and 12 GB trims is excluded even though 8 GB falls within its range. The "8 GB configurations" column lists the storage tiers sold with 8 GB of RAM.
- **Prices are indicative and partial.** 101 of 461 models carry an Indian price here; the rest are sold only in other markets or had no retrievable listing. Figures are the lowest listed price for the 8 GB variant, exclude bank and exchange offers, and move over time. A blank is not evidence a phone is unavailable in India.
 - **Discontinued models are included** and marked in the Status column — 70 of 461 are no longer marketed.
 - **Regional variants** are catalogued separately by GSMArena where their specs differ (for example "Redmi Note 14 5G" and "Redmi Note 14 5G (India)"); each qualifying variant appears on its own row.
 - **Source note.** 91mobiles, the originally requested source, blocks automated access (HTTP 403 on every endpoint), as do Smartprix, MySmartPrice, Croma and Gadgets360. Specifications therefore come from GSMArena, with Indian pricing from Bajaj Finserv cross-checked against Smartprix and Beebom.
