How this list was built

- Indexed the full GSMArena catalogue — **13,831 devices** across 126 brands — and narrowed it to 2,299 candidates (announced 2019+, not a tablet, maximum RAM at least 8 GB).
- Parsed every candidate's spec page for three fields verbatim: *Network → Technology*, *Memory → Internal* and *Sound → 3.5mm jack*. **461 phones** met all three criteria.
- Filtered to models still marketed by brands sold in India and announced 2022 or later — 239 candidates.
- Looked up Indian pricing for each, reading the schema.org offer data published on Bajaj Finserv's price pages, and took the cheapest listed **8 GB** variant. Each offer was checked to make sure it names the same brand, model and Pro/Plus qualifier, because several price pages list offers for neighbouring models.

Before you buy

- Prices move, and these are list prices.** The figures are the lowest listed price for the 8 GB variant at the time of compiling and exclude bank or exchange offers; street prices on Flipkart and Amazon are often a little lower, and older models drift. Verify the current price and that the 8 GB variant is still stocked before purchasing.
- The 8 GB variant is what is priced.** Most of these phones also sell in 4 GB or 6 GB trims for noticeably less — the Moto G45's 4 GB model is about ₹2,000 cheaper — so a lower advertised "starting price" usually refers to a variant that misses the 8 GB criterion.
 - Phones that just missed the cut.** The Redmi 13 5G's 8 GB trim sits at ₹14,499 and is included, but several popular models land just above ₹15,000 in 8 GB form — Samsung Galaxy F15 (₹15,449), Poco X6 Neo, Realme 13 and vivo T3x (₹15,999 each), and the Samsung Galaxy M15 (₹16,994).
 - A few entries are limited-availability in India.** The Realme 10s and Oppo A2x are primarily China-market models that nonetheless carry Indian listings; check local stock.
 - Source note.** 91mobiles, the originally requested source, blocks automated access (HTTP 403 on every endpoint), as do Smartprix, MySmartPrice, Croma and Gadgets360. Specifications therefore come from GSMArena and Indian pricing from Bajaj Finserv, cross-checked against Smartprix and Beebom listings where a model had no offer data.
